PROFESSIONAL SUMMARY

Final-year Computer Science Engineering student graduating in 2026 with hands-on experience in **AI tools, automation workflows, and backend development**. Proficient in **Python, APIs, and AI-powered applications** with experience building chatbots, automation systems, and AI-assisted content workflows. Interested in exploring new **AI tools, LLM capabilities, and practical automation solutions** that reduce manual effort in digital operations and content production.

EDUCATION

Bachelor of Technology, Computer Science and Engineering	2022 – 2026
JNTUH University College of Engineering, Wanaparthi	CGPA: 7.9 / 10.0

TECHNICAL SKILLS

Programming	Python, JavaScript, SQL
AI & LLM Tools	ChatGPT, OpenAI API, Prompt Engineering, AI Automation Workflows
Backend Development	FastAPI, Flask, REST APIs, Client–Server Architecture
Databases	MySQL, MongoDB, SQLite, Database Design
Automation Tools	Zapier, Make (Workflow Automation), API Integrations
Data & AI Libraries	Pandas, NumPy, Scikit-learn
Cloud & DevOps	Git, GitHub, Docker, AWS Basics, Linux
Tools	Postman, Jupyter Notebook, VS Code
Soft Skills	Analytical Thinking, Problem Solving, Collaboration, Communication

INTERNSHIP EXPERIENCE

AI Intern — Infosys Springboard	Summer 2025
- Developed an AI-powered chatbot using Python and API integrations to automate responses and assist users with information retrieval. - Implemented backend services and modular architecture to support chatbot workflows and scalable integration. - Applied prompt engineering techniques to improve response accuracy and contextual understanding. - Tested chatbot performance and optimized responses through iterative feedback and debugging. - Collaborated with team members using Agile practices to build and refine AI-driven features.	

PROJECTS

AI Social Media Content Automation	2025
- Built an AI workflow that automatically generates social media captions, hashtags, and content ideas. - Integrated APIs and automation tools to streamline content creation and scheduling processes. - Reduced manual effort in content planning by automating repetitive marketing tasks.	
AI Document Summarization Tool	2025
- Developed a Python-based tool that summarizes long documents using NLP and LLM APIs. - Implemented preprocessing pipelines to clean text data and generate concise summaries. - Designed a simple interface for uploading documents and retrieving summarized insights.	

CERTIFICATIONS

- Programming using Python — Infosys Springboard
- Ultimate React.js Course — Udemy
